

Open and edit photos

To open and make basic edits to photos you've saved on your Chromebook, use the image editor.

Open a photo with the image editor

1. Sign in to your Chromebook.
2. Click the Launcher .
3. Select Files .
4. Double-click the photo you want to open.

View photos or see a slideshow

- To see your photos as large thumbnails, click Thumbnail view .
- To scroll through your photos one at a time, click Slide view .
- To see your photos in a slideshow, click Slideshow .

Edit your photos

To show a list of editing tools so you can make basic edits to your photos, click Edit .

- To rename a photo, click the file name in the upper left corner. To save the new name, press **Enter**.
- To automatically adjust brightness and contrast, click Auto-fix .
- To adjust brightness and contrast yourself, click Brightness .
- To crop your photo to a different size, click Crop .
- To rotate your photo, click either Rotate left  or Rotate right .
- To undo or redo changes you've made to your photo, click Undo  or Redo .

To do more advanced photo editing, you can also use an app like [Google Photos](#), [Pixlr Editor](#), or [Sumo Paint](#)
