## Create Assignments in Kami for Google Classroom

There are two main ways to create a Kami assignment:

The first is to click the "Create" button in Classroom, and then select "Create Kami assignment."

ADD TOPIC	The-Adventures-of-Huckleberry-Finn-Excerpt-I (1 PDF - via Kami	(1).pdf Each student will get a copy Create encouncement
STREAM	i interes all'AL	
Show deleted items	Add class comment	

The second is to open Kami and on the front page select the "Create Classroom Assignment" button.

Either of these options will take you to the assign screen, which looks similar to the Google Classroom assign screen. You can create a title, add instructions, and attach a file using Google Drive or a local file. This will create an assignment within Classroom as well. I would recommend selecting "Make a copy for each student" (selecting "Students share one copy" means they will all be annotating the original).
