#### High School Math Classes

Math students in grades 9-12 are asked to bring a two-line scientific calculator capable of fraction conversion to class. Calculators that have two lines of display are recommended. This allows students to see what they entered and to edit their work, if necessary, without reentering duplicate information. A two-line scientific calculator of this type will be used in all junior and senior high math classes except Pre-Calculus. At times, students will not be allowed to use them such as when learning how to add, subtract, multiply and divide. Two-line scientific calculators can be purchased for about \$15.00. In Pre-Calculus, students will be allowed to check out and be responsible for a graphing calculator but it highly recommended purchasing own Ti-84 Plus Ce.
